Dear Mark,

**Thank you!**

We are extremely grateful for your kind donations of computer tablets and a television during your visit to Casa Jimmy. Further more for your recent donation of computer tablets.

Your technology gifts have had a great impact on the children's education. Thanks to you the children are now learning to use technology that would otherwise be inaccessible to them. It all adds to the bigger picture of essential tools and projects that enables them to have better prospects and thrive in life.

*There are many terrifying realities that force countless children onto the streets: domestic violence, being orphaned or abandoned, or simply belonging to dysfunctional families.  
For most there is no way back.*

Task Brasil's socio-educational project, Crescer provides out-of-school workshops in a variety of subjects including English, IT, art music, income-generating skills, sport, communication and introductory finance. Project Stepping Stone provides advice and support for our past residents and their families, so that they continue attending school, receive health care treatment and have access to further education and vocational training.

Task Brasil works to support the families to live in harmony, to ensure that their children build the firm foundations needed to lead independent and fulfilling lives, avoiding a return on living on the streets.  
**We would like to express our heartfelt thanks to you, yet again for your brilliant support.**

We do hope you keep in touch with us.

Best wishes,

James Rorrison  
Trustee  
Task Brasil Trust
